As the Coronavirus (COVID) has been spreading throughout the world, MAVAGI has made the decision to implement several precautions into our normal daily cleaning routines. All of our sites will now carry the products GS Neutral Disinfectant cleaner and/or TB-Cide Quat. Both products are designed to disinfect as well as clean and have the Human Coronavirus claim for inactivating the virus on non-porous surfaces (see-attached documentation).

To be most effective, application of the product will be to common touched surfaces such as light switches, door handles, counters and railings. In order to be most effective, the product will be sprayed onto a clean towel, then wiped onto the target area and wiped off after 10 minutes of contact time.

Additionally, MAVAGI recommends that all persons take common sense precautions such as:

- Wash hands frequently with soap and water and especially after using facilities or touching anything
- Use sanitizer gels minimum 60% alcohol
- Do not touch unnecessary surfaces (railings, counters, walls)
- Cover your cough or sneeze with tissue or in the crook of your arm

Thank you all for your support of our company and mission to employ persons with significant disabilities.

Mike Stevens
Vice President
MAVAGI Enterprises, Inc.
